## **Dear breeders and ANGUS-friends,**

This year everything is different and so unfortunately, we could not organize an Angus auction as the years before. Nevertheless, we would like to give you the opportunity to buy quality cattle and so this catalog was created for you. You can choose between 26 Aberdeen Angus breeding bulls from the Donaumoos Angus farm with outstanding international genetics.

But what does quality cattle mean? Of course, they should deliver premium meat in the end, but everything is connected and the quality actually starts at a completely different point.

The key to an Aberdeen Angus cow is fertility. Because as a wise man once said: first a calf must go in before a calf comes out. And a calf must come out, otherwise we will only have losses with this cow.

This means, we also need a good calving behavior with our cows, so that our cows bring as many living calves into the world as possible, because for each calf that dies, it needs roughly 9 living calves with at least 100 g above average gains to compensate for the financial loss.

Our cows have to be able to calve alone in the pasture, so that they can be easily managed even with little personnel.

For this the character of the animal is crucial. Because to leave the cow calving in the pasture for calving is only possible if you can reach the cow to help in case she has difficulties and if the cow lets you go near the calf to put in the ear tags. Of course, a friendly, calm and trusting character is also important for the handling of the animals in general, especially to enable a stress-free handling or transport of the animals - for the animals as well as for the owner.

The production of Aberdeen Angus cattle and quality meat is possible on grass - a naturally renewable resource. Food competition is an aspect that is becoming increasingly important in view of the growing world population we have to feed. But we take a raw material that is worthless to humans in this form - grass, which also grows on sites unsuitable for other crops, and refine it into quality meat, by making it available to humans as food.

For Angus quality beef, the trend is more towards a lighter carcass, but the inner values are important. An Angus animal which is fatty, with a lot of outer fat and without marbling does not qualify for premium meat. What we need and what Donaumoos Angus stands for is an Angus carcass with the best inner values, i.e. a lot of marbling without an excessive outer fat layer.

Because of the scandals in the meat industry this year, the market development towards quality meat has intensified. The demand for Angus quality beef from natural and transparent production is constantly increasing and already exceeds the supply. So, join us in using the potential of Aberdeen Angus to produce quality beef on pasture!

*Bernhard Delle*

## Donaumoos Angus

Bernhard Delle founded Donaumoos Angus in 1990 with the aim of practicing sustainable agriculture and producing quality beef that he could no longer obtain on the market for his butchery. His Aberdeen Angus cattle are intended to enable the an economic breeding of suckler cows operation on pasture.

Since 1998, Bernhard Delle has won numerous national and international awards with his Aberdeen Angus cattle and bulls and has earned recognition both in Europe and overseas. In the meantime, Bernhard Delle is managing the farm very successfully with his sons Michael and Martin. In breeding they put a special focus on easy calving, good growth, as well as carcass quality and structure. It is important to them to avoid extremes in the individual traits. They prefer harmonious animals with balanced characteristics (Balanced Angus).

Donaumoos Angus offers its customers proven genetics to build up high quality breeding herds. This includes that the whole Donaumoos herd is tested for genetic defects, all animals are double Myostatin free, and all breeding animals are genetically tested for the color black (red factor).

Donaumoos Angus is constantly doing research to optimize and maximize efficiency and breeding progress. In addition to the standard tests, we use additional selection methods, such as ultrasound measurement of the back-muscle area and both genetic testing and our own butchery testing for tenderness, marbling and feed conversion to ensure consistent performance monitoring.

This means that the premium breeding cattle for premium beef is not only bred and adapted to the requirements of the market, but exceeds this performance is even exceeded both nationally and internationally requirements!

# KEY TO THE SYMBOLS

## HORN STATUS:

<b>Pp</b>	= heterozygous hornless	<b>P</b>	= phenotypic hornless
<b>PP</b>	= purebred hornless	<b>PS</b>	= loose horns
<b>//</b>	= twin	<b>ET</b>	= Animal originates from embryo transfer
<b>PP*, Pp*, pp*</b> = are laboratory-tested for horn status			
<b>PS*</b> gen. hornless (heterozygous laboratory-tested), phenotypic loose horns			

**Colour:** r = red, s = black

**The sections of the herdbook:** **A** = herdbook, main section A **C** = pre-herdbook section C  
**B** = herdbook, main section B **D** = pre-herdbook section D

**Awards:** B,L,R = National- (B), country level- (L), Regional show (R); S = Winner, RS = Reserve Winner

**Daily gain (TZ) in g:** (weight - birth weight) divided by age in days

**Myostatin Angus:** mhf: Animal tested free, mhp: Parents free

**Classifications:** The animal classification according to the characteristics type, muscling and skeleton with marks from 1 to 9 (9 = optimum). The frame is described as  
 G = large, M = medium, K = small. For example: 8 8 7 G

**EKA:** First calving age in months  
**ZKZ:** Time between to calvings in days  
**KK:** number of calvings/number of calves  
**GGN:** Birth weight of progeny in kg (male/female)

**RZF** = **Relative breeding value beef (average value = 100) / Safety (%)**  
**mat** = **breeding value daily gain 200 day maternal**  
**TZ** = **breeding value daily gain 365 day**  
**B** = **breeding value muscling 365 day**  
**RZL** = **Relative breeding value breeding performance with safety (%)**

**Index:** Assesment through the Association for males: from 01.10.1994 to 30.09.2002 nationwide; for an average value of 100 and a standard deviation of 12 points

## EL Individual performance:

birth weight in kg, 200-days performance: deviation of own weight in %, corrected to the 200th day / daily gain to weighing date; 365-days performance: deviation of own weight in %, corrected to the 365th day / daily gain to weighing date;

**Example:** EL: 40 kg 104/1324 107/1372

The calf weighed 40 kg at birth. At the 200-days weight, it was 4 % above the yearly farm average and registered to that date a 1324 g daily gain. The values for the second weighing at 365 days are +7% and 1372 g daily gain.

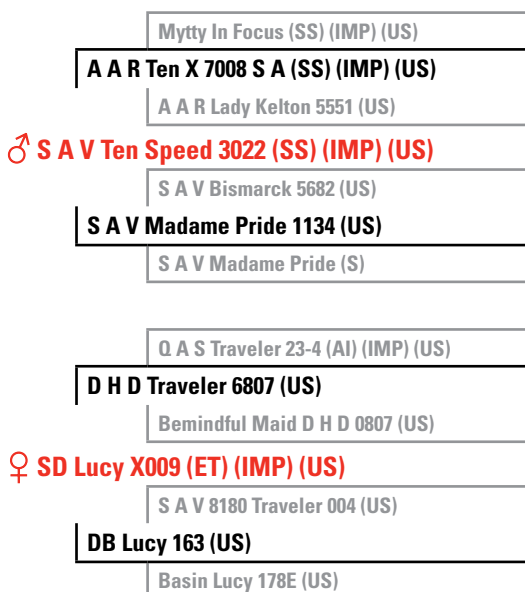

**Bio:** Biofarm (Biobetrieb)

## Donaumoos Luca S372 (AA)

Born: 26.11.2016

One of our reference bulls for the first time: North American genetics successful in Donaumoos!

Donaumoos Luca S372 inherits on his father's side SAV Ten Speed out of AAR Ten X, the top sire in America for meat quality and the cow maker SAV Bismarck, and on his mother's side with the Angus icon DHD Traveler 6807 and SD Lucy X009 from Basin Lucy (Montana), the ancestress of the Lucy lines.

**Successful licensing of 15 Luca-sons. Average evaluation:**  
type / muscling / skeleton -  
8 / 8,2 / 7,8

This is inheritance on the highest level!

In addition to these excellent external values, the bulls also have top internal values, as Donaumoos Luca S372 inherits back muscle area and top marbling.

## **Donaumoos Gigang S383 (AA)**

Born: 07.12.2016

One of our reference bulls for the first time: In Top 25 list for RZF!

Donaumoos Gigang S383 inherits the proven meat quality of Ardrossan Admiral A2 and the show potential of SAV Heritage 6295 and Belvin Lady Blossom 64'04.

C A R Duke 104 (US)
